

Newsletter 5 - September, 2018

Dear readers

Wellbeing, social cooperation, individual employability and economic competitiveness can be achieved if people are well educated. Regarding to this, vocational education and training are becoming increasingly important worldwide. Therefore the need for active cooperation between vocational schools and businesses is considered as a powerful push for reforms in vocational education systems in many European countries and around the world

The project "Innovative VET Materials for the Professional Field of Mechanical Engineering, Metalworking and Metallurgy in Vocational Education and Training" - 3MVET's main aim is to support teachers from vocational schools, mentors and other stakeholders in the field of vocational education and training. 3MVET also has the ambition to influence students, trainees and specialists in the sectors of mechanical engineering, metalworking and metallurgy.

The intellectual outputs that 3MVET's team created during the project are completed and now available for download from the project website: www.3MVET.eu. In this newsletter we introduce you to their content and main features.

We wish you pleasant and interesting moments in reading it!

NEWS
